AVID DOCK

Mini footprint. Massive control

Mixing deadlines have met their match. Avid® Dock (formerly Pro Tools® | Dock) provides intelligent studio control in a portable, ergonomic, and affordable surface. Integrated with the free Avid Control app running on your iOS or Android tablet, you get the quick touchscreen access and tactile precision control you need to record, edit, mix, and monitor projects faster. All in a compact surface that works with your favorite audio and video software, connects with other Avid control surfaces, and easily fits in any studio space and budget.

MIX WITH SPEED AND PRECISION

Mixing can be tedious with a keyboard and mouse alone. Or lacking in tactile feedback with just a touchscreen. With the combination of touchscreen, fader, knob, and switch control, you gain incomparable navigation speed and tactile precision to create better sounding mixes faster. Jump to any track or section with a touch. Create custom macros to perform complex tasks instantly. And mix with your ears—not your eyes—with ergonomic controls you can feel at your fingers.

EXPAND YOUR VERSATILITY

Forget limiting yourself to a single application, workflow, or industry. With Avid Dock, you can work with multiple software tools in parallel instead of porting projects. Get extensive software control and integration. Handle every aspect of a production from beginning to end. Mix music, audio post, and video projects. And extend the capabilities of Avid S1 and S3. All from a single integrated control surface.

WORK WITH YOUR FAVORITE CREATIVE TOOLS

Experience the deepest level of integration and control with Pro Tools. Plus, get exceptional control of Media Composer®, Logic Pro X, Cubase, Premiere Pro, and other EUCON®-enabled audio and video software. Because the Dock is EUCON-aware, it automatically switches its controls to the application in focus on your computer. Or you can lock down parts of the surface to specific software for multi-application control.

GET MAJOR CONTROL AT A MINOR PRICE

No other control solution offers the incredible power of tactile and touch control, previously only found in the acclaimed Avid S6, at a fraction of its size and price. Access hundreds of software functions and commands as well as interact with EQ, dynamics, and other parameters, right from the surface. And gain powerful touchscreen capabilities, Attention "Super" Channel control, Soft Knob mapping, channel meters, more Soft Keys, EQ graphs, and other views and controls when using Avid Control on your tablet.

GAIN FULL MONITORING CONTROL

Control any EUCON-enabled monitoring system—including XMON™, Pro Tools | MTRX, and monitor sources in your DAW—right from the Avid Dock surface or in the Avid Control app. Take full control of source selections, speaker cuts, talkback, and cues. You can even lock parts of Avid Dock to your monitoring application for dedicated monitor control while controlling another DAW with the rest of the surface for mixing.

KEY FEATURES

> Take control of Pro Tools, Media Composer, Logic, Cubase, Nuendo, Premiere, and other audio and video software

> Speed up editing and mixing by integrating your iOS or Android tablet with the free Avid Control app (tablet not included)

> Get extensive touchscreen and tactile control, plus critical visual feedback

> Access and adjust EQ, panning, plugins, sends, and other settings right from the surface

> Gain full control of monitoring sources, speaker cuts, talkback functions, and more

> Trigger frequently performed functions and commands with 16 programmable Soft Keys

> Quickly focus a touchscreen track to the "attention" channel with a touch-sensitive, motorized fader

> Navigate large sessions easily with the jog wheel, transport keys, or color-coded Universe Scroller

> Customize and recall layouts and complex macros with a single button press

> Automate tracks effortlessly with 12 dedicated automation switches

AVID DOCK—Mini footprint. Massive control.

BRING ENHANCED TOUCH WORKFLOWS TO S1 AND S3

Pair Avid Dock with an Avid S1 or S3 control surface and you gain even more timesaving workflows. Speed up tasks with physical transport, jog, shuttle, and focus fader capabilities. Enable more flexible touchscreen workflows. Customize and recall layouts quickly. Work with VCA groups more easily. And trigger frequently performed functions and macros with dedicated Soft Keys as you continue mixing on S1 or S3.

HARDWARE SPECIFICATIONS

Channel strips/faders	1 "attention" channel with a single touch-sensitive, motorized fader
Encoders	9 total—8 push-top, touch-sensitive channel control encoders; 1 monitoring control encoder
Metering	1 10-segment meter with pre- and post-fade metering options
Navigation	Jog wheel with full transport control section
Additional controls	32 hardware buttons for various mode selection functions, 2 programmable touch strips, 16 programmable Soft Keys
Ancillary I/O	1 USB 2.0 port (for tablet charging), 1 footswitch port (1/4-inch TRS), 1 Ethernet port, Kensington lock slot
Height (front, rear w/knobs)	1 inch, 5.4 inches (2.7 cm, 13.8 cm)
Width	13.9 inches (35.2 cm)
Depth	14.1 inches (35.9 cm)
Weight	4.2 lbs (1.9 kg)

COMPATIBLE SOFTWARE

EUCON-ENABLED APPLICATIONS*

> Avid Pro Tools
> Avid Pro Tools | Ultimate
> Avid Media Composer
> Avid Media Composer | Enteprise
> Avid Media Composer | Ultimate
> Avid XMON EUCON
> Adobe Audition
> Adobe Premiere
> Apple Logic Pro
> Digital Audio Denmark DADman
> Harrison Mixbus
> MOTU Digital Performer
> Magix Samplitude
> Magix Sequoia
> Merging Technologies Pyramix
> Steinberg Cubase
> Steinberg Nuendo
> Trinnov Audio D-MON

MACKIE CONTROL/HUI-ENABLED APPLICATIONS

> Ableton Live
> Cockos REAPER
> Propellerhead Reason

Please note that while these applications are EUCON-enabled, the extent of integration with Avid Pro Mixing control surfaces and supported software versions are at the sole direction of the respective manufacturer. For details, please contact the manufacturer.
